HIGH DENSITY

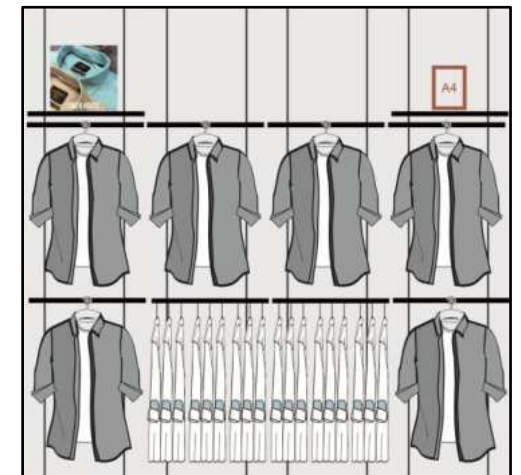

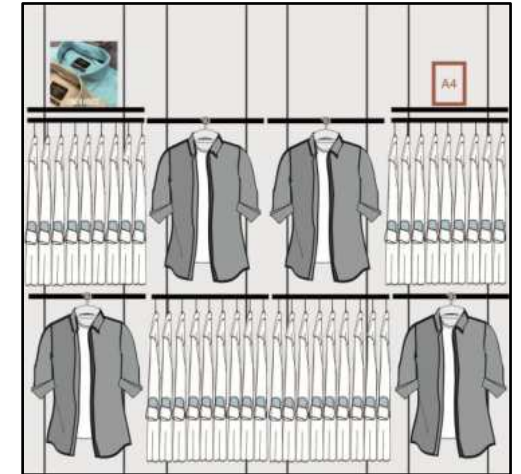

LOW DENSITY

JACKET WALL

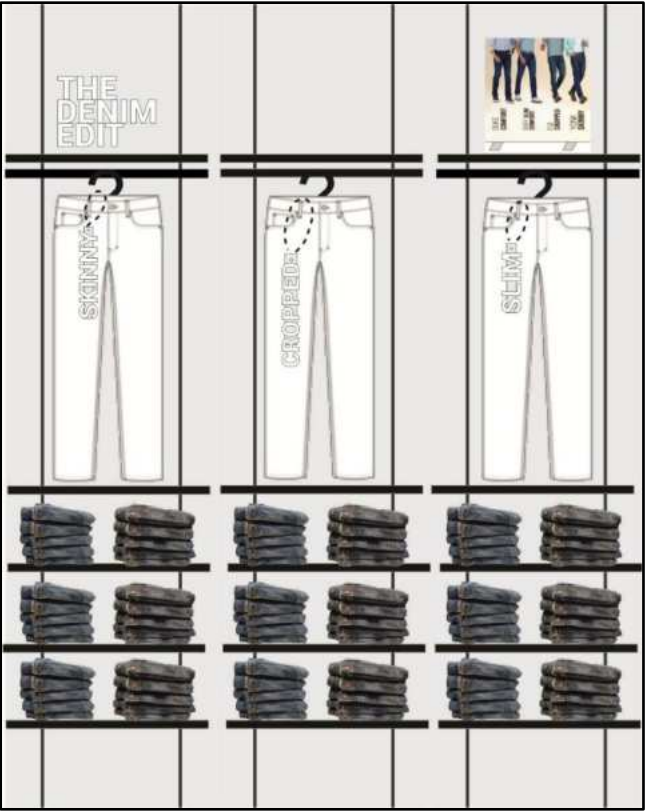

ES CATEGORY WALL

*In high density wall, hang 4 styles in side hang

NEW IDENTITY

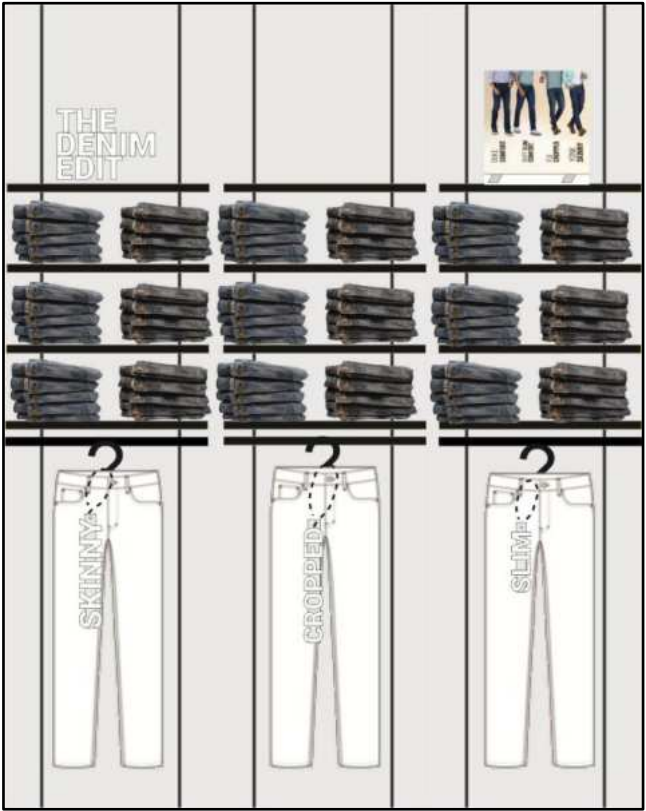

LOW DENSITY

HIGH DENSITY

OLD IDENTITY

PRINCIPLE

- Polos to be displayed style wise, not colour wise
- Fashion articles in season colours to be prioritised for front hang/top shelf, followed by Luxe and Prime Polo
- Printed and solid polos to be segregated

FOLDING GUIDELINE

- A4 folds with placket alignment
- Brand logo of top product must be visible

HS tee sleeve
fold detailing

Polo placket
fold

Regular ceiling elevation

Low ceiling elevation

PRINCIPLE

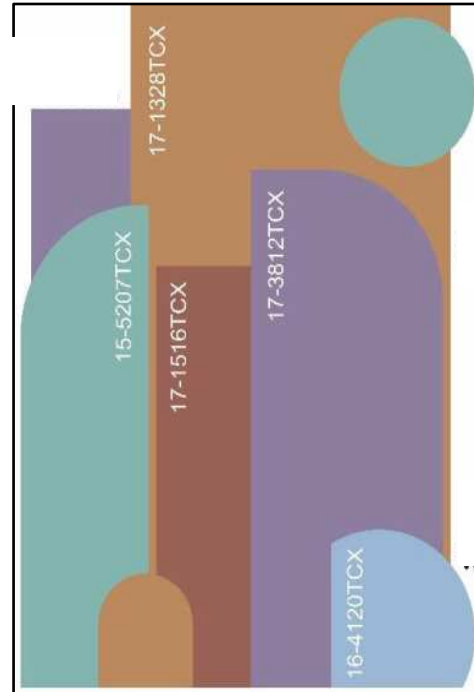

- Front hang different fits with fit tag for identification
- Highlight washed out denims to bring focus on the style
- Denim edit branding and fit guide are a must on top of the wall
- Bleed zero denims to be highlighted via shelf talker

FOLDING GUIDELINE

- Zip fold as shown in below link
- Hanging denims to be folded from bottom- 3 folds of 1" each except Fiji fit (cropped denim)

[VID-20250124-WA0024.mp4](#)

- Front pocket 2 fold with bottom fold on top to highlight American fold at the hem as shown in above image

Tie knot and flap detail

PRINCIPLE

- Highlight different season colours (lighter shades) on front hang
- Focus on partywear and ceremonial suits paired with floral shirts
- Co-Ord suits can be used on this wall in case ceremonial suits are available in limited styles. Pair them with season colour tees/polos

ALIGNMENT GUIDELINE

- Merchandise on side hang to be well aligned with 2 finger spacing
- styles must be kept in order of size, starting S-XL

Key article partywear suit:
NL-DO-RHINE1

Key article Hybrid Co-Ord set:
BP-SO-KENNETH

*All suits/jackets to be unbuttoned and overlap the button side flap for display

*First button of all shirts to be opened in case no tie is used. Cardboard collar to be used for sturdiness

*Use ties (along with butterfly plastic collar) wherever possible on suit. Pocket square is mandatory in suit as well as blazer

PRINCIPLE

- Single colour, light to dark shade in a single row
- Arrangement of merchandise to be as shown in the image

PRINCIPLE

- Segregate casual shoes from formal shoes
- Arrange light to dark from top to bottom

Key points to remember

1. For work related occasions: Choose formal palette (BP), lighter coloured shirts and 5 core formal shades i.e. navy, grey, black, beige, brown for trousers, suits or jackets
2. Avoid clash of print/pattern: Make one pattern/print hero of the look and create the outfit around it
3. Pairing shirts with light suits: Choose lighter shirts and match the tie colour with the suit, however if you are proposing a darker shirt with a light suit then do not pair light tie on a dark suit. Instead avoid tie or pick a tie that is darker shade than the shirt
4. While pairing 3 categories (Jacket+ shirt+ trouser): Match colour of any 2 and pick the third piece in a complimenting contrast
5. Pairing accessories: Always match shade of the belt with the shoes and your tie and pocket square with the suit colour
6. Pairing hints from accents: Take the hints of pairing from the garment accents to create a look. For a formal look, if there are no accents then focus on monotone look, use different shades of a single colour

SHIRT TIE PAIRING

Pair lighter shirts and match tie to the waistcoat or pick a darkened shade of the suit

For muted colours like grey and beige, you can pick darker tie/pocket square of the same colour as the shirt

Avoid dark shirts under lighter suits

Avoid ties when using a printed/jacquard shirt

COMBINATION GUIDE

Pair micro dobies/solid with patterns

Solid can be paired with printed shirts

Do not pair different colours together

Office wear combinations:

1. Prefer light coloured shirts
2. For bottoms- Use navy/black/charcoal grey/brown/beige

CASUAL STYLING OF SUITS

THANK YOU
